Summary

Full Stack Web Developer.
I started studying programming in early 2022, and with that choice in mind, I adapted my routine to incorporate programming and studies into my daily life. I formed a networking group to exchange experiences and interact with friends in the field. I began consuming a lot of technical and entertaining content about programming, all of which helped me tremendously in maintaining daily focus and continually evolving.

I am proficient in React with NextJS and Typescript/Javascript. I also build systems/servers using Node and Express or PHP, employing either functional programming or object-oriented programming. I work with databases like MongoDB or MySQL. Additionally, I am learning to develop software using C#.

In 2023, I gained my first freelance experiences, and as a result, in 2024, I was able to invest in and enroll in my first higher education course in Systems Analysis and Development. I am open to opportunities in the field! I am a native Portuguese speaker and have advanced proficiency in English for reading, listening, and writing.

Experience

Desenvolvedor Front-End

Denys Tips
Feb 2024 - Feb 2024 (1 month)
Landing page for tutorial videos and contact presentation.

Desenvolvedor Web Fullstack

Storm Store
Jan 2024 - Feb 2024 (2 months)
Ragnarok Zeny and Items E-commerce.

Desenvolvedor Web Fullstack

Arte e Brilho Artesanato
Dec 2023 - Feb 2024 (3 months)
Development and maintenance of an Ecommerce platform for religious articles, including inventory and product management through an internal system that I developed. Key technologies used: NextJS (React), TypeScript (JavaScript), and TailwindCSS.

Desenvolvedor Web Fullstack

Le Parfum DF
Dec 2023 - Feb 2024 (3 months)
I studied two versions of the Bling API (ERP) as the client aimed to develop a fully customized e-commerce platform, integrating and updating information through the Bling API. However, while already in development, after a certain evaluation of the APIs, the latest version proved to be incompatible with our requirements. On the other hand, the previous version, although meeting our requirements, was

scheduled to cease operation in the middle of the year. Faced with this, we opted for the most viable solution, which involved using pre-built templates offered by NumveShop, a Bling partner. From this template, I made some specific adjustments through CSS.

Mobile Developer
wtpsapp
Sep 2023 - Feb 2024 (6 months)
Development and customization of features on demand in mobile apps built with React Native, within an ecosystem that includes a translation system, shipping functionality, notifications, sales, barcode scanning and recording, use of a currency conversion API, product registration, services, real estate, and various others. The project utilizes React Native with TypeScript, Styled-Components, and the backend is built with PHP.

Desenvolvedor Front-End
Denys Tips
Oct 2023 - Oct 2023 (1 month)
I developed a landing page with focus on responsiveness, design based on customer preferences, composing thumbnails and video editing. I chose to use React with Vite, Typescript and css modules to promote better code organization.

Desenvolvedor Web Fullstack
devgames-app
Apr 2023 - Apr 2023 (1 month)
I worked on the successful migration of two projects to cutting-edge technologies. The first project, originally built with Node.js, JavaScript, jQuery, and HTML, and the second one with Preact, were modernized with TypeScript and Next.js along with Serverless Functions, as per the client's request.

Education

Descomplica Faculdade Digital
Análise e Desenvolvimento de Sistemas
2024 - 2026
