Portfolio: https://vitosdeveloper.vercel.app/
Github: https://github.com/vitosdeveloper/

Currently pursuing a degree in Systems Analysis and Development at Descomplica, I'm a full-stack developer with 1 year of experience focused on creating solutions for everyday problems. I'm proficient in React, React Native, NextJS, TypeScript, JavaScript, CSS (Sass, Less, Scss, css-modules), CSS libraries (Tailwind CSS, Bootstrap, Styled Components, Material UI), and develop systems and servers with NodeJS, Express, NestJS, C# with ASP.NET or PHP, using MongoDB, MySQL or Prisma, Docker, Object-Oriented Programming, TDD, DDD, Clean Architecture or Hexagonal Architecture.

Professional Experience:

- **Full-Stack Developer at Denys Tips** - February 2024 (1 month)
  - (Freelance) Activities: Developed a landing page for video presentations and contact.
- **Full-Stack Web Developer at Storm Store** - January 2024 (2 months)
  - (Freelance) Activities: Developed an e-commerce platform for selling Zenys and Ragnarok items.
- **Full-Stack Web Developer at Arte e Brilho Artesanato** - December 2023 (3 months)
  - (Freelance) Activities: Developed and maintained an e-commerce platform for religious articles, managing inventory and products through an internal system. Key technologies: NextJS (react), TypeScript (javascript), TailwindCSS.
- **Full-Stack Web Developer at Le Parfum DF** - December 2023 (3 months)
  - (Freelance) Activities: Explored two versions of the Bling API (ERP) to develop a fully customized e-commerce platform. Due to compatibility issues and the discontinuation of one version, we opted for pre-built templates from NumveShop, customizing them with CSS.
- **Mobile Developer at wtpsapp** - September 2023 (6 months)
  - (Freelance) Activities: Developed and modified features on-demand in mobile apps built with React Native. The project includes a translation system, shipping, notifications, sales, barcode scanning, currency conversion, product registration, and more. The project uses React-native with TypeScript, Styled-Components, and a PHP backend.
- **Front-End Developer at Denys Tips** - October 2023 (1 month)
  - (Freelance) Activities: Developed a responsive landing page with a focus on design and video editing. Used React with Vite, TypeScript, and CSS modules for better code organization.
- **Full-Stack Web Developer at devgames-app** - April 2023 (1 month)
  - (Freelance) Activities: Successfully migrated two projects to cutting-edge technologies. The first project, originally in Node.js, JavaScript, jQuery, and HTML, and the second in Preact, were modernized with TypeScript and Next.js with Serverless Functions.

Education:

- Descomplica Digital University, Systems Analysis and Development. (Currently Enrolled) 2024 - present

Additional Information:

- Intermediate English: reading, writing, speaking
- Over 20 certifications in the field:
